Contents

Papers

1 **The iron and steel industry in Venezuela** C. Bodsworth

7 **The UK steel industry and its future** C. E. H. Morris

21 **Thermodynamic considerations in designing gas injection lances submerged in melt** S. C. Koria

28 **Role of mixing in powder injection desulphurisation processes** G. A. Irons

37 **Simple self-tuning Smith predictor and PI (proportional and integral) controls for China Steel's coke oven heating supply systems** M. W. Wu

41 **Weldability of a high purity offshore cast steel** J. Koivula, R. Katila, J. Liimatainen, and H. Martikainen

49 **Microalloyed high carbon steel rod** S. Jaiswal and I. D. McIvor

55 **Microalloyed very low carbon steel rod** I. D. McIvor

75 **Reconstruction of VOEST-ALPINE LD Steel Plant no. 3 at Linz** H. Wiesinger, H. Wimmer, G. Kincel, and W. Nieder

83 **Characterisation of iron ores for production of high quality sinter** D. C. Goldring and T. A. T. Fray

90 **Effects of chemical composition of iron oxides on their rates of reduction: Part 1 Effect of trivalent metal oxides on reduction of hematite to lower iron oxides** U. F. Chinje and J. H. E. Jeffes

96 **Indices for evaluating results of melting down test** Jiyao Mu, Xuegong Bi, and Gengxue Xi

101 **Degradation behaviour of coke at high temperatures in blast furnace** Y. Iwanaga

110 **Effect of externally imposed magnetic field on tundish performance** O. J. Ilegbusi and J. Szekely

116 **Thermodynamic analysis of boron concentration changes in steel during electroslag remelting** J. Fedko and M. Krucinski

123 **Nitrogen in the steel product** W. B. Morrison

138 **Air cooled hot blast valve** J. Seeger and W. Kuckertz

145 **Developments in British Steel** R. Baker

151 **Mineralogy and mineral formation in iron ore sinter with addition of magnetite fines**
R. A. Button and P. H. A. Lundh

165 **Importance of tar content in selecting coals for blast furnace injection**
W. P. Hutny and J. T. Price

168 **Improved steels for the rod and wire industry**
T. J. Pike

174 **Use of Spreadsheets in feasibility studies and modelling of steelworks**
E. C. Hewitt

183 **Some perspectives on mathematical modelling of metals processing operations**
J. Szekely

193 **Technical note: Rephosphorisation of steel in ladle**
A. S. Venkatadri, L. K. Singhal, and C. R. Srinivasan

197 **Steel's still no. 1**
J. D. Destefani

219 **Clean steel, dirty steel**
J. Nutting

228 **Reducibility, reduction under load, and strength characteristics of fired laboratory compacts of Nimbra and Itakpe iron ores**
U. K. Epke and R. D. Walker

234 **Dephosphorisation with iron oxide slags**
J. Ahmad and C. Bodsworth

241 **Physical metallurgy of microalloyed medium carbon engineering steels**
T. Gladman

246 **Review of international activity on microalloyed engineering steels**
D. J. Naylor

253 **Sheffield and the development of stainless steel**
K. C. Barraclough

266 **Computational fluid flow capabilities and software**
N. C. Markatos

277 **The new scrap handling system at Sheerness Steel** J. W. Clayton and S. Severs

289 **Electrode consumption in arc furnaces** F. Charmier

292 **Installation, commissioning, and operation of eccentric bottom tapping facility on the Brymbo 100 t UHP furnace** C. L. Jackson and K. G. Thomas

303 **Electric arc furnace technology: Recent developments and future trends**
L. L. Teoh

314 **Iron- and steelmaking in Soderberg electric arc furnaces**
G. P. Crawford

320 **Stepwise reduction of Itakpe iron ore compacts to magnetite, wüstite, and iron**
E. B. Ekanem and R. D. Walker

325 **Increasing production rate of a sinter machine using heat of hot sinter returns**
S. I. Okeke and F. N. Okoye

331 **Decopperisation of molten steel by various slags**
X. Liu and J. H. E. Jeffes

335 **Effect of phosphorus on microstructure and strength of high carbon steel rod**
B. D. Clarke and I. D. McIvor

345 **Computational flow modelling applied to BOS oxygen lance design**
T. Robertson, D. S. Beishon, and C. J. K. McIntee

357 **The emergence of an African iron and steel industry**
J. Astier

379 **Evolution of microstructure in iron ore sinters**
G. O. Egundebi and J. A. Whiteman

386 **Microstructural relationships in fired laboratory compacts of synthetic oxide mixtures and of Itakpe iron ore**
E. P. Oaikhinan and R. D. Walker

392 **Quantitative determination of softening properties of sinter by measuring apparent softening viscosity**
Y. Iwanaga

399 **Potassium effects in solution loss reaction of metallurgical coke**
D. J. Harris and D. J. Young

406 **Strand deformation in continuous casting**
B. Barber and A. Perkins

412 **British Steel, General Steels Scunthorpe Works conversion of 2 strand slab machine to 4 strand (twin) bloom casting**
G. Ashton, D. E. Humphreys, and G. Taylor

419 **Product characteristics and machinability of bloom cast, free cutting steels**
K. S. Atwal, A. Reeder, and T. J. Pike

426 **Use of refractivity data for obtaining optical basicities of transition metal oxides**
J. A. Duffy

429 **Development of electrochemical sensor to measure hydrogen in gases and liquid and solid metals**
D. R. Morris, R. V. Kumar, and D. J. Fray

435 **Characteristics of steelworks dusts**
C. E. McDonnell, D. R. Triger, and B. B. Argent

446 **Technical note: Kinetic regularities in joint reduction of nickel and iron oxides under non-isothermal conditions**
A. Cores, A. Formoso, M. T. Larrea, and J. Ortiz

News from Industry

pages 1, 65, 133, 197, 277, and 357

Book reviews

pages 109, 204, and 354

Translations

pages 63, 129, 195, 274, 353, and 450
